NATIONWIDE BUILDING SOCIETY

CLIENT CONTEXT

Nationwide Building Society is a retail Bank in the UK, and the largest Building Society in the world headquartered in Swindon, England. It provides retail banking services to about 15 Mn customers (members) in the UK and has been consistently the top 3 Mortgages provider in the UK. Accenture has been engaged in providing AD and AM services in the area of Open Banking for last 5 years.

THE CHALLENGE

- **Timelines** – Compliance and Regulatory Requirements

- **Performance** - 100% Application Availability, High Scalability, No Latency.

- **Security** - High security required to APIs exposed over the network.

- **Auditing** - All the TPP requests and responses generated by APIs required Auditing to backtrack issue(if any).

THE JOURNEY

Improve Resilience & platform stability

- Helped set up API reference architecture that served as foundation for implementing Account and Payments APIs

- Migration of Dev/Test environments from ACP (Accenture Cloud) to client AWS instance

- Completion of the CMA roadmap by implementing all regulatory requirements to date

- Industry Pioneers in some of the complex regulatory like VRP Sweeping and DCR (Dynamic Client Registration – TPPs)

- Simulated prod like environment to support Automated Shift left performance testing.

Simplify Change Delivery

- Designing E2E Story Map, PI Planning, Enhanced business collaboration and Early Visibility to Business

- Automated setup of E2E build and test pipelines implemented using DevOps resulted in reduced number of Jenkins jobs

- Automation of Robot Test Platform covering ~5k scenarios.
